

Care Instructions for your Fursuit

Congratulations on your fluffy companion!

To ensure long-lasting enjoyment of your fursuit, here are some care tips:

1. Gentler Handling

Handle your fursuit with care and love. Avoid sudden movements and excessive friction. Many details are handcrafted and require extra care.

2. Ventilation is Key

After wearing, ventilate your fursuit well by hanging it in a ventilated area to reduce moisture. To prevent odors, we recommend cleaning your fursuit after use with isopropyl alcohol (available on Amazon).

3. Stain Removal

If you have small stains, don't worry! Use mild soap or stain remover and test them on an inconspicuous area first. After longer events, it's recommended to treat the fursuit with a wet/dry vacuum cleaner, which can be rented.

4. Brush Gently

Afterward, gently brush the item with a soft brush or a fursuit comb to remove loose hairs. Please avoid brushing too vigorously! Unfortunately, fur doesn't grow back. 😞

5. Keep it Dry

Ensure to keep the fursuit dry. Store your fursuit in a dry, low-light place and avoid excessive heat or moisture to prevent material damage.

6. Repairs

For minor damages, carefully sew yourself or feel free to contact me for assistance.

7. Stay Cool

Do not wear your fursuit for too long without breaks. Stay cool and hydrated! I recommend purchasing sportswear with a cooling effect, such as those from Under Armour. For a larger budget, there's also the option of cooling vests, for example from EZCool.

8. Have Fun!

Your fursuit is made for adventures. Enjoy every minute, be creative, and simply have fun!

For further questions, we're happy to assist. Enjoy your fursuit adventure!

With fluffy regards,

FenFen Creations
